Before you begin connecting with people on Pinterest you need to add some interesting and relevant pictures to your profile page as this is where someone will visit to see what kind of stuff you are posting.

If they visit your profile and you have no profile image and very few posts that aren't related to anything they like then why would they be interested in following you?

If your profile has a nice picture of you and you have a number of posts that interest them, then they are more likely to feel that it's worth following you.

### 22 Add to tries

 

*When you have pins that may be of recipes, places, activates or experiences then you can let people know that you've tried them. Click the tries tab and then click add next to those you've done or tried*

*Whenever you create a post aim to create an attention grabbing, intriguing, controversial, emotional headline. Something that grabs someone's attention within the first few words*

### 23 Add emojis

 

*Sometimes emojis can help your post stand out but be aware that some people love emoji's whilst some people can't stand them. If you're on a computer and want to easily add emojis then go to <https://www.emojicopy.com/>*
